

```
In [11... # Interactive Farm Task Checklist
checklist = ['Irrigate field', 'Check soil moisture', 'Apply fertilizer',
             'Spray pesticide', 'Harvest tomatoes']

completed_tasks = []
incomplete_tasks = []
```

Moving tasks

pop() removes the last task from checklist.

append() adds that task to the correct list.

```
In [12... checklist.pop()
completed_tasks.append('Harvest tomatoes')    # 'Harvest tomatoes':done

checklist.pop()
completed_tasks.append('Spray pesticide')      # 'Spray pesticide':done

checklist.pop()
incomplete_tasks.append('Apply fertilizer')    # 'Apply fertilizer':notdone

checklist.pop()
completed_tasks.append('Check soil moisture')# 'Check soil moisture':done

checklist.pop()
incomplete_tasks.append('Irrigate field')      #'Irrigate field':notdone
```

```
In [13... # Print the lists
print("checklist:", checklist)
print("completed:", completed_tasks)
print("incomplete:", incomplete_tasks)

checklist: []
completed: ['Harvest tomatoes', 'Spray pesticide', 'Check soil moisture']
incomplete: ['Apply fertilizer', 'Irrigate field']
```
